

NODE 1 — Multi-Format Intake

- ❖ **Type:** Input Node
- ❖ **YOU DON'T ENTER ANYTHING, JUST CRAETE THE FIELDS**
- ❖ **Fields to define:**
 - *raw_text (string)*
 - *raw_image (file)*
 - *raw_file (file)*
 - *raw_json (json)*

NODE 2 — Data Import Node (Public API)

- ❖ **Type:** Data Import
- ❖ **YOU ENTER: API URL (public API, mock or file JSON)**
- ❖ **Output name:** `external_data`

NODE 3 — Parallel Split

- ❖ **Type:** Parallel
- ❖ **YOU DON'T ENTER ANYTHING, JUST CRAETE THE BRANCHES**
- ❖ **CREATE 3 BRANCHES:**

A — Text Extraction
B — Image Analysis
C — Metadata & Claims

BRANCH A — TEXT ANALYSIS

BRANCH A HAVE 3 NODES

NODE A1 — OCR/Text Extraction

- ❖ **Type:** Text Extraction
- ❖ **YOU DON'T ENTER ANYTHING , JUST CONNECT.**

- ❖ Input: `raw_file, raw_image, raw_text`
- ❖ Output: `extracted_text`

NODE A2 — Agent: `ai_likelihood`

- ❖ Type: Agent Node
- ❖ **You enter:** `ai_likelihood.txt`
- ❖ Output: `ai_likelihood_output`

NODE A3 — Agent: `linguistic_anomaly`

- ❖ Type: Agent Node
- ❖ **YOU ENTER PROMPT:** `linguistic_anomaly.txt`
- ❖ Output: `linguistic_output`

BRANCH B — IMAGE ANALYSIS

BRANCH B HAS 2 NODES

NODE B1 — OCR/Image-to-Text

- ❖ Type: OCR node
- ❖ Output: `image_text`
- ❖ **YOU DON'T ENTER ANYTHINGG.**

NODE B2 — Agent: `image_detection`

- ❖ Type: Agent Node
- ❖ **U ENTER PROMPT:** `image_detection.txt`
- ❖ Output: `image_ai_output`

➤ BRANCH C — METADATA & CLAIMS

BRANCH C HAS 2 NODES

NODE C1 — Agent: claim_check

Type: Agent Node

U ENTER PROMPT: claim_check.txt

Output: claims

NODE C2 — Python Code: metadata_rules

❖ Type: Python Node

❖ U SAVE metadata-rules.py

❖ INPUT FROM: claim_check, metadata fields, thresholds.json

❖ Output: metadata_flags

■ UNDERSTAND STAGE

NODE 4 — Aggregator Node

❖ Type: Aggregator

❖ YOU DON'T ENTER ANYTHING , JUST CONNECT outputs

- A2 output
- A3 output
- B2 output
- C1 output
- C2 output
- Node 2 external_data

❖ Output name: understanding_bundle

■ DECISION STAGE

NODE 5 — Python Code: deterministic_rules

- ❖ **Type:** Python Node
 - ❖ **U SAVE** `deterministic_rules_engine.py`
 - ❖ **INPUT FROM:** `understanding_bundle` + `thresholds` + `deterministic_rules.yml`
 - ❖ **Output:** `rule_flags`
-

NODE 6 — Python Code: scoring_engine

- ❖ **Type:** Python Node
- ❖ **U SAVE** `scoring_engine.py`
- ❖ **INPUT FROM:** `understanding_bundle` + `scoring_config.json`
- ❖ **Output:** `final_risk_score`

NODE 7 — Decision Node: Risk Routing

- ❖ **Type:** Decision Node
- ❖ **YOU ENTER 4 CONDITIONS IN CONDITIONS.TXT FILE**

■ REVIEW STAGE

NODE 8 — Agentic Review

- ❖ **Type:** Agent Node
- ❖ **U ENTER PROMPT:** `agentic_policy_review.txt`
- ❖ **Output:** `agentic_review_output`

NODE 9 — Human Review

- ❖ **Type:** Human Review Node
- ❖ **Fields:**
 1. `decision`
 2. `reviewer_comment`
 3. `timestamp`
 4. `override (yes/no)`

■ DELIVER STAGE

NODE 10 — Python Code: `audit_json_generator`

- ❖ **TYPE:** Python Node
- ❖ **U SAVE** `audit_json_generator.py`
- ❖ **INPUT FROM:** all final fields, decisions
- ❖ **Output:** `final_risk_score`

NODE 11 — Delivery Node

Choose from:

- ✓ Google Sheets
- ✓ Email
- ✓ JSON Export

Output: final_delivery
